Aerospace success in China for Water Jet Sweden

Picture shows the super-accurate Water Jet Sweden Cutting Machine NC 3520S 5-axis before its recent delivery to China for application in the manufacture of aero engines. This installation will be the fifth delivered by the Swedish company to this potentially huge market.

Editor's note

The Water Jet Sweden AB plant built only 11 years ago at Ronneby, Sweden, has established itself as the leading source worldwide of the ultimate in accuracy in water jet cutting technology, hence its rapid growth to a supplier of standard and custom-built machines around the world, including the USA, Russia and China.

In Europe, in addition to Germany, two new subsidiary companies recently have been established: WJS UK Ltd, United Kingdom, and Water Jet Polska, Poland.

The text of this release and high-resolution versions of the photographs can be taken from the disc enclosed or on request.
